

The Pet Convincer Plus™ User's Guide

Congratulations! You have purchased the most comprehensive, pain free, humane and safe pet training device ever created by **Canine Innovations..!**

With proper use, your pet (dog/cat) will quickly learn what behaviors are off limits.

As with any tool, the Pet Convincer Plus is most effective when used correctly. Please take a moment to read through this user's guide so that you and your pet can get on the road to enjoyable companionship!

The Device.

There are three (3) major components to the Pet Convincer Plus:

1. Head – trigger, interchangeable nozzle, lock
2. Body (acts as a Hand Grip)
3. Cartridge (CO₂; inside the Body)

Getting Started:

IMPORTANT: You should get acquainted with the Pet Convincer Plus **BEFORE** you attempt to use it. Make sure that these procedures are accomplished away from your pet and children. **Do not let children use the Pet Convincer Plus. It is not a toy!**

Loading the Device:

Threaded CO₂ Cartridge: Grasp the Body of the device with one hand and the Head with the other. Turn the Head counter-clockwise and separate the two parts.

- a) Without depressing the trigger lever,

screw the Cartridge slowly onto the matching threads in the Head's bottom until the Cartridge begins to contact the Head's internal puncture pin.

- b) Then, quickly continue screwing in the Cartridge until hand tight (cannot be turned/screwed in anymore by hand, without excessively over tightening. Also see NOTE below.) This punctures (activates) and seals the CO₂ Cartridge to the Head. Reattach the Body to the Head.

(See images a & b)

NOTE: You may hear a little “puff” or hiss of air as the Cartridge is screwed on. No unwanted, escaping CO₂ leakage/hissing air occurs if the Cartridge seals correctly to the Head.

Only when the Cartridge is empty, unscrew the empty Cartridge and please recycle the steel cylinder as locally appropriate.

c) **Safety Lock Feature:** Using your thumb, move the red safety lever lock to the “up” position to lock the trigger lever. Moving the red safety lever lock to the “down” position unlocks the front CO₂ trigger lever and **ONLY** then allows CO₂ to be dispensed by the Pet Convincer Plus.

(See image c)

Safety First:

The Pet Convincer Plus is very safe and effective, when used correctly by an adult.

You should always:

Store your Pet Convincer Plus at normal ambient room temperature.

Visually inspect the device for damage before using after being dropped.

You should never:

Use the Pet Convincer Plus at a distance closer than 8 inches (minimum distance).

You should never:

Point the Pet Convincer Plus towards the face, eyes, or rectum of any animal.

Use the Pet Convincer Plus for any purpose other than those specified in these user guide instructions.

Testing the Device:

This should be done away from your pet.

Point the device away from your face and pull the trigger in a quick, short burst.

Once you are comfortable with the trigger mechanism, you may want to try the device on your hand at the minimum distance of 8 inches.

Each Cartridge will emit 15-30 bursts, depending on how long you depress the trigger. Short (~ one second) air bursts (blasts) are recommended to control your pet’s behavior with the Pet Convincer Plus.

Why it Works:

The Pet Convincer Plus interrupts and discourages unwanted behavior.

This device is so effective that many times only a single application is needed to “cure” a problem behavior.

Using the device correctly is critical for success, so please read the following instructions carefully before using the Pet Convincer Plus with your pet.

Using the Device:

Now that you are familiar with the function and feel of the Pet Convincer Plus, you are ready to use it to interrupt and discourage unwanted behavior of your pet.

You may want to set up a scenario that you are certain will illicit unwanted behavior. For Example, if your pet/dog likes to steal food from the counter, place a dish of food on the counter and supervise your pet for signs of interest.

When you see your pet attempt to get the food, give your pet/dog a verbal warning such as growling the word “WRONG” or making a sound like “AARRHHH”.

Immediately after giving the verbal warning, spray the Pet Convincer Plus just under, at the pet’s shoulder blade or next to your pet (never in their face/eyes/rectum) at a minimum safe distance of 8 inches or more.

Your pet/dog will startle and you should stay still and say nothing to your pet for a moment or two.

Then call your pet/dog away from the area and reassure him/her that leaving the scene was the right thing to do.

You should never yell at or verbally correct your pet/dog after activating the Pet Convincer Plus. Once the pet has stopped the unwanted behavior, you should praise his/her compliance.

It is as important to praise the good behavior as it is to correct the unwanted behavior. You are teaching your pet how you would like him/her to behave, so be supportive and reward their good behavior.

Hi-output Nozzle Attachment:

← Screw on – Unscrew off

This nozzle attachment is used in place of the original, standard nozzle supplied with the Pet Convincer Plus device to provide additional air blasting power of CO2. This increases the force of the burst by approximately a factor of two. It is useful for controlling the behavior of stubborn pets. This also reduces the number of bursts available from the Cartridge to approximately half of the bursts with standard nozzle usage. While holding the Pet Convincer Plus device in one hand, unscrew the small silver-colored nozzle extension with the other hand by twisting counter-clockwise until it is removed. Store this original nozzle in a safe place for later use. In a clockwise fashion, screw on the longer hi-output nozzle until snug/finger tight. The Pet Convincer Plus, with interchangeable nozzles, is now ready to use with the Hi-output Nozzle!

Enjoy using your Pet Convincer Plus with your pet!
