

The Pet Convincer Pro User's Guide

Congratulations! You have purchased the most comprehensive, pain free, humane and safe pet training device ever created!

With proper use, your customer's pet (dog/cat) will quickly learn what behaviors are off limits.

As with any tool, the Pet Convincer Pro is most effective when used correctly. Please take a moment to read through this user's guide so that you and your customer's pet can get on the road to an enjoyable relationship!

The Device.

There are three (3) major components to the Pet Convincer Pro:

1. Head – trigger, nozzle, lock
2. Grip (also reusable Cartridge insulator)
3. Cartridge (CO₂; inside the Grip)

Getting Started:

IMPORTANT: You should get acquainted with the Pet Convincer Pro **BEFORE** you attempt to use it. Make sure that these procedures are accomplished away from all

pets and children. **Do not let children use the Pet Convincer Pro. It is not a toy!**

Loading the Device:

Threaded CO₂ Cartridge: Grasp the Head of the device with one hand and the CO₂ Cartridge with the other.

a) Without depressing the trigger lever, screw the bare Cartridge slowly into the treads in the Head until the Cartridge begins to contact the puncture pin.

- b) Quickly continue screwing in the Cartridge until hand tight (**cannot be turned/screwed in anymore by hand, without excessively over tightening. Also see NOTE below.**) This punctures (activates) and seals the CO₂ Cartridge to the Head. Place the Grip over the Cartridge. You are now ready to start “convincing” pets.

(See images a & b)

NOTE: You may hear a little “puff” as the Cartridge is screwed on. No unwanted, escaping CO₂ leakage/hissing air occurs if the Cartridge seals correctly to the Head. Only when the Cartridge is empty, unscrew the empty Cartridge, slip off the reusable Grip/insulator and please recycle the steel cylinder as locally appropriate. Retain the Grip for use with a new Cartridge.

c) **Safety Lock Feature:** Using your thumb, move the red safety lever lock to the “up” position to lock the trigger lever. Moving the red safety lever lock to the “down” position unlocks the front CO₂ trigger lever and **ONLY** then allows CO₂ to be dispensed by the Pet Convincer Pro.

(See image c)

Safety First:

The Pet Convincer Pro is very safe and effective, when used correctly by an adult.

You should always:

Store your Pet Convincer Pro at normal ambient room temperature.
Visually inspect the device for damage before using after being dropped.

You should never:

Use the Pet Convincer Pro at a distance closer than 8 inches (minimum distance).
Point the Pet Convincer Pro towards the face, eyes, or rectum of any animal.
Use the Pet Convincer Pro for any purpose other than those specified in these user guide instructions.

Testing the Device:

This should be done away from all pets.

Point the device away from your face and pull the trigger in a quick, short burst.
Once you are comfortable with the trigger mechanism, you may want to try the device on your hand at the minimum distance of 8 inches.
Each Cartridge will emit 60-75 bursts, depending on how long you depress the trigger. Short (~ one second) air bursts (blasts) are recommended to control a pet's behavior with the Pet Convincer Pro.

Why it Works:

The Pet Convincer Pro interrupts and discourages unwanted behavior.

This device is so effective that many times only a single application is needed to “cure” a problem behavior.

Using the device correctly is critical for success, so please read the following instructions carefully before using the Pet Convincer Pro with a pet in your care.

Using the Device:

Now that you are familiar with the function and feel of the Pet Convincer Pro, you are ready to use it to interrupt and discourage unwanted behavior of a pet.

When you see a pet exhibiting unwanted behavior, give the pet/dog a verbal warning such as growling the word “WRONG” or making a sound like “AARRHHH”.

Immediately after giving the verbal warning, spray the Pet Convincer Pro just under, at the pet's shoulder blade or next to the pet (never in their face/eyes/rectum) at a minimum safe distance of 8 inches or more.

The pet/dog will startle and you should stay still and say nothing to the pet for a moment or two.

Then call the pet/dog away from the area and reassure him/her that leaving the scene was the right thing to do.

You should never yell at or verbally correct a pet/dog after activating the Pet Convincer Pro. Once the pet has stopped the unwanted behavior, you should praise his/her compliance.

It is as important to praise the good behavior as it is to correct the unwanted behavior. You are teaching the pet how you would like him/her to behave, so be supportive and reward their good behavior.

Enjoy using your Pet Convincer Pro to control your customer's unruly, misbehaving pets!

the other hand. Store the horn in a safe place until its need arises again.

Pet Convincer Pro Options:

- 1) **Hi-output Nozzle Attachment.** This attachment is used in place of the original, standard nozzle supplied with the Pet Convincer Pro to provide additional air blasting power of CO₂. This increases the force of the burst by approximately a factor of two. It is useful for controlling the behavior of stubborn pets. This also reduces the number of bursts available from the Cartridge to approximately half of the bursts with standard nozzle usage. While holding the Pet Convincer Pro in one hand, unscrew the small silver-colored nozzle extension with the other hand by twisting counter-clockwise until it is removed. Store this original nozzle in a safe place for later use. In a clockwise fashion, screw on the longer hi-output nozzle until snug/finger tight. It is now ready to use.

← Screw on – Unscrew off

- 2) **Mystical Acoustic Head/Horn Attachment:** This attachment is placed over the originally supplied, standard nozzle only. While firmly holding the Pet Convincer Pro device in one hand and the horn in the other, it is pushed on until snug/cannot be pushed on further by hand and/or the front edge of the small horn inlet is in-line with the front edge of the second knurled band. This step is very important to avoid having the horn accidentally fly off of the nozzle and become an unwanted projectile. This horn is recommended for outside use only because it emits/creates a loud (>110 db) blast of noise that should not be used unnecessarily or near human/animal ears. The horn is useful for dog recall and for getting the pet's attention from distances up to ½ mile away. Operate at arm's length away from the operator, pointing/rotating the horn in the general direction of desired use, creating one short blast or a series of short blasts in the same manner as you would operate the Pet Convincer Pro to produce air bursts with the nozzle only attached. To remove the horn, while holding the Pet Convincer Pro with one hand, simply pull the horn off of the nozzle tip with

← Push on – Pull off
